EDUCATION

St. Francis Institute of Technology.

Bachelors of Information Technology Engineering (B.E) IT; CGPA: 8.63/10.00.

Mumbai, India

Aug 2019 – Jul 2023

SKILLS

Programming: Python, SQL, MySQL.

Generative AI & Agentic Frameworks: LangChain, LangGraph, OpenAI APIs, RAG Pipelines, Prompt Engineering, Tool Calling, AI Agents, Hugging Face, LangSmith, N8N, RapidMiner.

ML & Data Science: Numpy, Pandas, Scikit-learn, TensorFlow, Keras, Forecasting, Clustering, Predictive Modelling, Embeddings, PySpark, Pytorch.

Backend & Deployment: Streamlit, Flask, Django, Git, GitHub, AWS (EC2, S3 basics), Selenium, CI/CD, Docker.

Other Skills: Data Structures, Teamwork, Problem-Solving, Communication, Mathematics and Statistics, Data Modelling, End-to-End, Data Pipelines, Agile Methodology, Automation, Observability, AI Workflows.

WORK EXPERIENCE

Neosoft | Data Scientist.

Mumbai

Meetings overview generator and Chemical blend production forecasting

Jul 2025 – Jan 2026

- Designed and deployed an LLM-powered video Meeting to the BRD document pipeline using structured prompting and workflow orchestration, reducing manual documentation effort by **90%** across **8+ stakeholders**.
- Developed a forecasting pipeline for SABIC's ethanol blend production datasets using ML models and time-series analysis, improving forecasting reliability and **reducing analysis effort by 20%**.
- Fine-tuned the Gemma 2 2B model on SBI Insurance datasets, processing **10k+ records** to improve domain-specific response relevance and workflow accuracy.

Blitzar Tech Pvt Ltd | Associate Software Engineer.

Mumbai

BMC Salary Program.

Feb 2024 – Mar 2025

- Contributed to web applications using Python for backend services, integrating REST APIs, and developing the application's UI using frontend technologies. Integrated continuous integration workflows for reliable data deployments.
- Automated the salary process for **1400+ schools**, reducing manual workload and **increasing efficiency by 80%**, and integrated AI-driven microservices with a lightweight ML model to flag outliers using historical data.

XEMI | Software Engineer Trainee.

Mumbai

HSN Recommender System and EwayBill Module.

Oct 2023 – Jan 2024

- Built a document intelligence pipeline using LangChain and GPT models for automated HSN code recommendation from unstructured documents. Annotated **300+ documents** to improve a model's accuracy from **65 to 78%**.
- Prepared training data and fine-tuned the OpenAI model parameters using the 22 sections of the HSN dataset. Improved the accuracy of HSN code prediction and streamlined the code assignment process.
- Created an EwayBill module using HTML, CSS and Angular to streamline and automate filling out the E-waybills(bill required for transporting shipments) form, reducing the manual workload.

Cere Labs | Data Science Intern.

Mumbai

Clustering of Indian Addresses to derive Business Insights.

Jul 2022 – Jul 2023

- Analysed and processed Indian address data, transformed it into a structured format, assigned precise geo-coordinates, and clustered locations.
- Implemented novel clustering algorithms with TSP validation to cluster geographic coordinates, leading to **28%** reductions in transportation costs and improved delivery times.

PROJECTS

FAQ Chat Bot with Retrieval Augmented Generation | [GitHub](#)

- Built an intelligent RAG chatbot that provides accurate and context-aware responses to frequently asked questions from customers. Instead of hardcoding the data, one could easily upload the PDF of the questions with answers.

Technology Used:- Streamlit, Langchain, Hugging Face Embeddings, Numpy, Pandas.

Earthquake Magnitude Prediction Model using Machine Learning | [GitHub](#)

- Predicted earthquake magnitude by factoring in time, depth, latitude, and longitude using ML Regression algorithms.

Technology Used:- Python, Flask, Numpy, Pandas, Scikit-learn, Matplotlib.

CERTIFICATIONS

Machine Learning Specialization - DeepLearning.AI and Stanford Online (by Andrew Ng)

- Covered topics supervised learning, unsupervised learning, deep learning, and best practices in ML model development.
